Dear Sir or Madam

I am writing in imposition to Mr. DeJoy's 10 yr plan. What he is proposing is going backwards for accessibility for the handicapped. As we age we Seniors become more dependant upon these services.

I remember when we used special paper for air mail services. Why would push progress back before that time - not using airfare for mail.

I also believe that Mr. DeJoy should be charged with the distruction of government property. Destroying specialized sorting machines - slowing our resources should be considered Criminal. I understand he also has conflicting investments in competing services.

Sincerely
Patricia Ann Holy
