To whom it may concern,

I wish to make my formal complaint about the closing of the Wesleyville Post office. I think it will bring unusual hardship to the community and the surrounding area. With the proximity of the Post office it receives lots of foot traffic form the local community and the local busline , it is handicapped accessible . The closest Post office is not handicapped accessible form the busline . To reach the closest Post office you have to take the bus downtown exchange bus to reach the Post office and then walk to the Post office about a one fourth of a mile on the road.

As a business owner in this community I think the Post office brings a certain civic identity to the town and the businesses that are located here. I use it to mail packages and to buy stamps. Senior citizens walk to the office because they do not drive. The Place is like a meeting place for the community .

Please consider leaving the Post office open. The people of this community would greatly appreciate it . I know you are trying to save money by closing certain Post offices But I think it will be a big mistake to close this Post Office .

Thank You
Ed Rickrode
