Office of PAGR

This country cares nothing about the OldPeople generation and how hard that is being done on everyone. No body listens to anyone anymore its really a shame. The Post OFFice here in Velpen is so very easy for me and lots of other people.

I wish that US Postal Service would reconsider and be here for the town.

Your up grades on all the Post Offices in the area really does not make any Finacial since at ALL. No wonder the Place is Broke wasting money Fixing things AND the Shuting the doors. Not good working ethics at all. The Right hand doesnt Know what the left hand is doing point in place. Your meeting with the town was certainly not thought out cause your people couldnt answer any of the queistions put to them. Called passing the buck.
