POSTAL REGULATORY COMMISSION

My appeal is based on taking away the peoples rights. I attended the Velpen Community meeting on March 17, 2011, and I also recorded this meeting and yes your four Postal Representatives seen my recording device + they said nothing about this. The meeting was a complete injustice to our community as no answers were given to any of our questions. Two weeks later I attended another community meeting in Cannelburg, IN, I was escorted out by the Police, because Tangela Bush the Postal Service representative said I could not record this meeting, I stated that this was a community meeting open to the public + local newspapers + she stated that this was her meeting. How do you justify this? I can record at one but the rules changed and I can not record the other "sounds like to me the Postal service has something to hide". The Postal service might get by with threatening their employees to keep their mouths shut but this in no way means they can take away a community's or persons rights.
