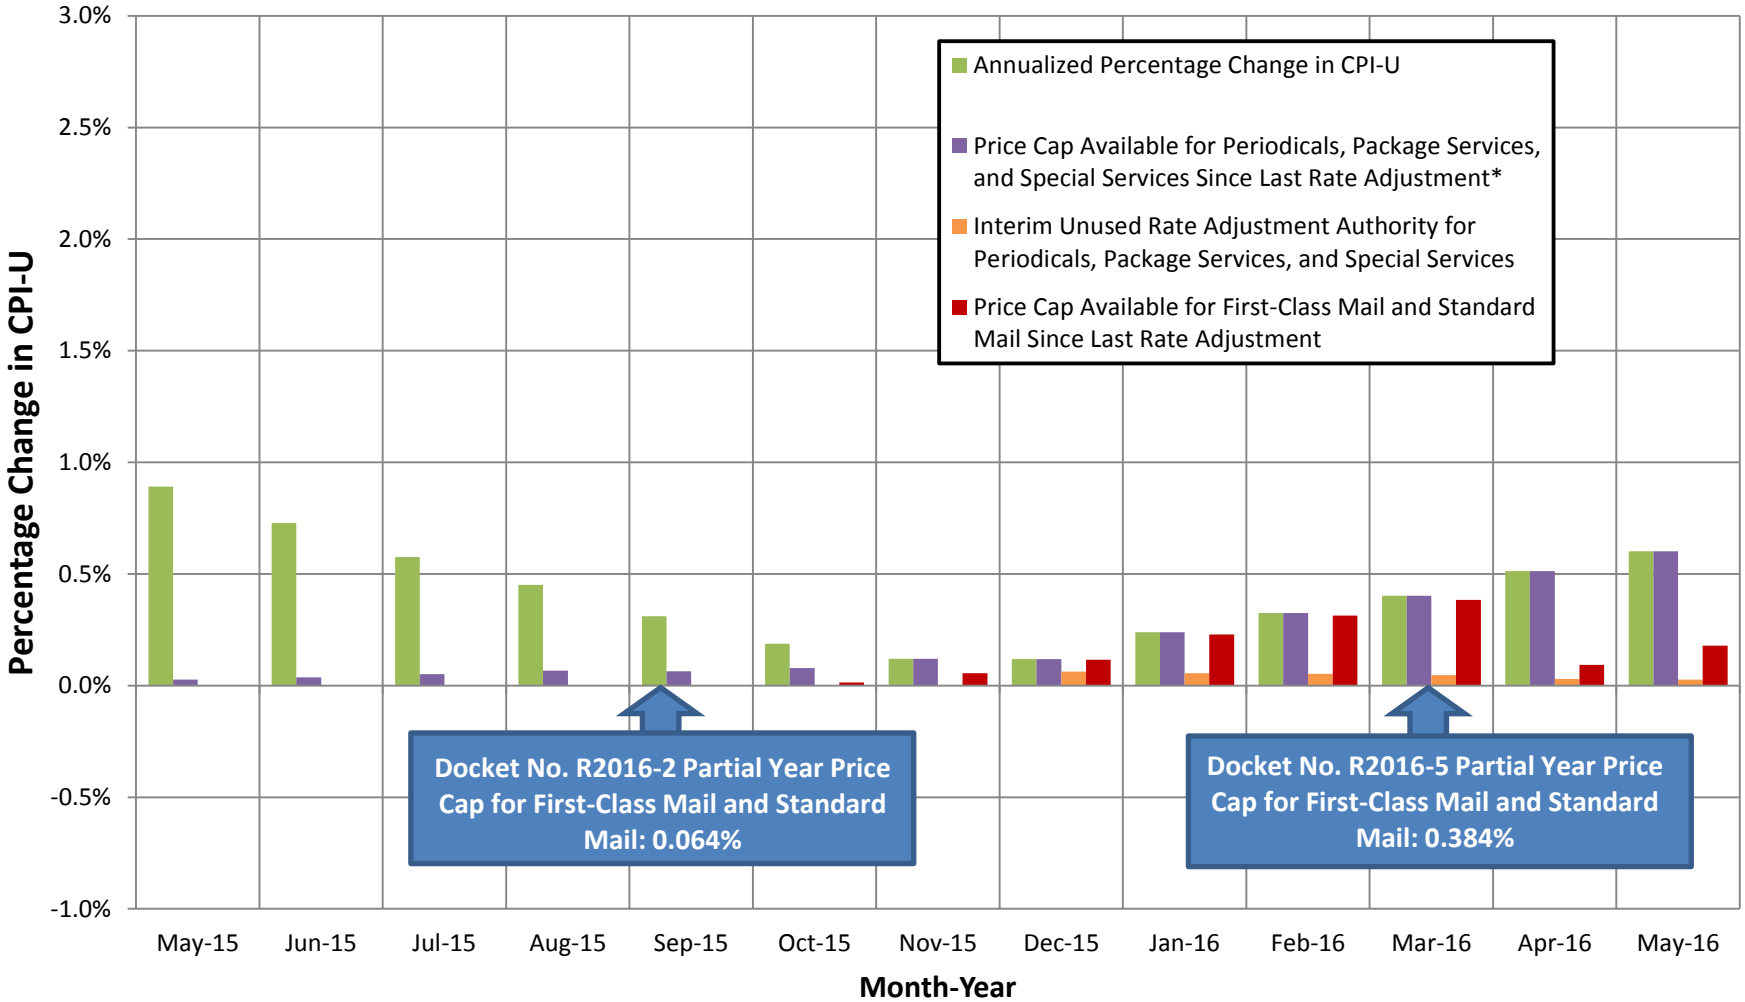
1/ Price Cap for Docket No. R2008-1
2/ Price Cap for Docket No. R2009-2
3/ Price Cap for Docket No. R2011-2
4/ Partial Year Price Cap for Docket No. R2012-3 equals 2.133 percent
5/ Price Cap for Docket No. R2013-1
6/ Partial Year Price Cap for Special Services for Docket No. R2013-7 equals 1.053 percent
7/ Price Cap for First-Class Mail, Standard Mail, Periodicals, and Package Services for Docket No. R2013-10; Partial Year Price Cap for Special Services for Docket No. R2013-10 equals 0.636 percent
8/ Price Cap for Docket No. R2015-4, Interim Unused Rate Adjustment Authority equals 0.281 percent
9/ Partial Year Price Cap for First-Class Mail and Standard Mail for Docket No. R2016-2 equals 0.064 percent
10/ Partial Year Price Cap for First-Class Mail and Standard Mail for Docket No. R2016-5 equals 0.384 percent

Explanation of How "Change in CPI-U" is Calculated:

The Commission determines the price cap for any 12-month period by calculating the ratio of two 12-month CPI-U averages that are 12 months apart, subtracting one, and expressing the value as a percentage. For a more detailed explanation of the calculation of the price cap please see 39 CFR §3010.21.

Annualized Percentage Change in CPI-U and Available Price Cap

May 2015 - May 2016



CPI-U annualized using a 12-month moving average. For a more detailed explanation of the calculation of the price cap, including partial year cap calculations, please see 39 CFR §3010.21-22.

* Price Cap Available for First-Class Mail and Standard Mail until September 2015.

Explanation of Bar Graph:

Generally, the Postal Service changes market dominant prices annually. To calculate the applicable annual percentage change in rates, the Commission first creates an annualized index that is the average of twelve monthly CPI-U figures. For example, to calculate the annualized index for November 2015, the Commission sums the CPI-U figures for each month beginning with December 2014 and ending with November 2015, and divides that sum by 12 to produce an annualized index for that 12-month period. To calculate the annualized percentage change, the Commission takes the ratio of two annualized indices twelve months apart and subtracts one from the quotient. The remaining amount is the annualized percentage change. The **green bars** on the graphs depict the trend of the ratio of two indices, the annualized percentage change, exactly twelve months apart throughout 2015 and 2016.

On occasion, the Postal Service may decide to change market dominant prices less than annually. In this circumstance the Commission takes the ratio of two annualized indices less than twelve months apart using the annualized index at the time of the last price adjustment as a base. For example, in Docket No. R2016-2 the Postal Service filed a market dominant rate change using the September 2015 index. Because the price adjustment occurs 10 months after the previous adjustment, the Commission uses the ratio of the annualized September 2015 index to the annualized November 2014 index. Simply, it is a ratio of two indices 10 months apart. The closer the Postal Service's partial year price change is to the most recent annual price change the smaller the allowable increase is compared with the annualized percentage change. For this reason, the allowable percentage price change is very small in the first month after a price change, but increases month by month, except under deflation. The **purple bars** and **red bars** on the graph depict the "build up" of the price cap, the allowable percentage price change, throughout the year for each class.

The Postal Service may also decide to change market dominant prices more than twelve months apart. When this happens, the purple and green bars will continue to be of equal height until the Postal Service changes market dominant rates. When rate adjustments are greater than twelve months apart, interim unused rate adjustment authority is generated as depicted by the **orange bars** on the graph.[1]

[1] This authority is excluded from the price cap calculation because the Postal Service is not required to use all of its unused rate adjustment authority in traditional rate adjustments.

Notes:

N/A means Not Applicable

*There is no annual limitation calculated in an exigent rate adjustment.

Dockets that are struck (i.e. ~~Docket No. R20XX-1)~~ indicate that unused rate adjustment authority from that docket expired pursuant to 39 U.S.C. 3622(d)(2)(C)(ii) and 39 CFR 3010.26(d) and is no longer available for future rate adjustments.

1/ All of the unused rate adjustment authority generated in Docket Nos. R2008-1, R2009-2, R2011-2 and a portion of R2012-3 was used to fund the above CPI-U rate adjustment approved in Docket No. R2013-1.

2/ A portion of the unused rate adjustment authority generated in Docket No. R2012-3 was used to fund the above CPI-U rate adjustment approved in Docket No. R2013-10.

3/ All available unused rate adjustment authority is exhausted as a result of the approved exigent rate adjustment in Docket No. R2013-11.

4/ Due to filings being more than 12 months apart, upon filing Docket No. R2015-4, interim unused rate adjustment authority was generated for the months not included in the annual limitation calculation (September 2013 - November 2013).

5/ A portion or all of the interim unused rate adjustment authority generated in Docket No. R2015-4 was used to fund the above CPI-U rate adjustment in the same docket.
