

Letter from Wilda Lunceford re. Hacker Valley Post Office closure.

Closing of the Hacker Valley Post Office has been such a disastrous thing for this community to be facing. The very fact that this community has pulled together to make this area a place for visitors to visit the beautiful mountain part of Northern Webster County in West Virginia is just one small indication of the importance of retaining our post office.

Not to mention the many business of individuals throughout the area and their need for the service of a post office that is available to them without having to travel, in some cases, as far as 30 or 40 miles.

The present location of the post office is centrally located and having access to the post office has been a necessity with the many important mailings we have had during our time spent here in this area.

The safety of these important documents that we send out and receive is of utmost importance to us. Having them inside an open vehicle and then delivered to a roadside box is not in the interest of complete safety. Having them delivered to a post office where they are indoors until I can pick them up is more to our preference.

It is with the utmost respect that we request that the Hacker Valley Post Office be reinstated in Hacker Valley, WV 26222.
