comments: As a retired citizen on a small fixed income, I urge you to keep postal rates as low as possible for first-class mail in the year ahead.
Please do NOT continue the very expensive (and, I might add, outrageous) practice of nickel increases (that was 10 percent last year, way more than my boost in Social Security) just because they are easily divisible by five. I can count. Think of the little guy, please! Every penny increase bites us.
Thank you.
