RE: Replacement of Current Postmaster General of USPS

Date: May 29, 2021

I am 71 years old. I have never seen the reduction of service, longer wait lines, delay in mail delivery and most importantly, the behavior changes of postal workers under the so-called leadership of the current postmaster General. I see the increased stress in the eyes of the local postal workers and their need to continually apologize for the wait. I see two out of the three service stations closed every time I am in the post office. One person to service a community of 70,000????

This is one of the most direct and personal services United States citizens experience with our federal government. We know, talk and wave to our delivery personnel every day.

For the sake of our democracy relative to mail-in ballots, for the sake of the postal employees and for the sake of our country, we need a Postmaster General with knowledge in the field and an awareness of the importance of the postal service.

Please vote to replace the person currently in this position. He is causing too much damage!
