

I am not a Postal employee or do business with them other than as a customer. I am a US citizen living in a rural area who relies on the Postal Service for my medications, bill paying, communications and voting in national and local elections. I would like to express my opposition to the N2021-1 proposed changes to the Postal System. They appear to have the intent to degrade service and standards. I believe that under the proposed changes my mail will no longer arrive quickly, accurately and dependably. The proposed cuts to service will only worsen the current situation brought on by changes made in the last few years. It would appear that the intent is to functionally destroy the post office.

I believe the PRC should ensure a reliable and efficient service that will serve our nation's people who rely on it. The Postal Service is especially useful to people in our rural areas of the United States. I want the Post Offices to survive but I believe these changes will ensure its demise.
