**RESPONSE OF UNITED STATES POSTAL SERVICE  
WITNESS L. PAUL LOETSCHER TO INTEROGATORY OF  
MAGAZINE PUBLISHERS OF AMERICA, INC.**

**MPA/USPS-T41-1:**

Table 2 of USPS-LR-J-114 disaggregates Periodicals Outside-County mail volume, weight, and number of containers by entry facility type, container type, and container size. Using the data used to produce Table 2, please provide an estimate of the number of Periodicals Outside-County sacks there are by sack size (i.e., number of pieces in sack), sack presort level, and entry facility. If the study did not collect enough detail to provide such an estimate, please provide an estimate of the number of sacks by sack size and sack presort level using the most recent data available. Please also describe the data source you used to develop the estimate.

**RESPONSE:**

Table 2 of LR-J-114 does not disaggregate Periodicals Outside-County mail volume, weight and number of containers by entry facility, container type and container size. Table 2 of LR-J-114 disaggregates Periodicals Outside-County mail volume, weight and number of containers by entry facility type, container type and container presort level. The study presented in LR-J-114 did not collect the data needed to estimate the distribution of sacks by size, presort level and entry facility. To provide an estimate, the study presented in LR-I-87/R2000-1 is used to estimate the FY1999 distribution of sacks by sack size and presort level. This distribution is then applied to the estimated sack counts presented in LR-J-114. The results are presented in Table 1 - MPA/USPS-T41-1. As preparation rules have changed since LR-I-87/R2000-1 was conducted, the distribution here may not be reflective of the current distribution of sack sizes.
