RESPONSE OF POSTAL SERVICE WITNESS THRESS TO
INTERROGATORIES OF GCA

e) The results of the reports cited in my response to d above suggested that stationarity did not appear to be a particular concern in the analysis of mail volume demand equations. In addition, Dickey-Fuller tests on the residuals from my regressions indicate the presence of no unit roots. Hence, to the extent some of the dependent variables may appear non-stationary, there appears to nevertheless exist a stationary linear relationship between the dependent and independent variables in every case here.

CERTIFICATE OF SERVICE

I hereby certify that I have this date served the foregoing document in accordance with Section 12 of the Rules of Practice and Procedure.
