POSTAL RATE AND FEE CHANGES, 2006

Docket No. R2006-1

NOTICE OF THE UNITED STATES POSTAL SERVICE
OF FILING REPLACEMENT PAGE 3 FOR USPS-T-29, DIRECT TESTIMONY OF
STEVEN M. SCHROEDER
[ERRATA] (July 19, 2006)

The United States Postal Service hereby provides notice that it is filing a replacement page 3 for the Direct Testimony of Steven M. Schroeder on behalf of United States Postal Service (USPS-T-29). The attached replacement page 3 should replace the original page 3, which was filed on May 3, 2006.

The only change is to the last sentence of witness Schroeder's testimony (lines 12-14 on page 3). In the original testimony, filed on May 3, this sentence read as follows: "The majority of parcel sampled [sic] had postage in the form of PVI or stamps." The revised sentence reads "The majority of *sampled parcels over 1 cubic foot in volume had payment* in the form of PVI or stamps (emphasis added)." No other changes have been made.

Respectfully submitted,

UNITED STATES POSTAL SERVICE

By its attorneys:

1 envelopes were developed using weighted averages. The Priority Mail parcel size
2 distributions were combined with the cubic foot estimates for Priority Mail flats and
3 Flat Rate Envelopes using distributional data from ODIS-RPW to arrive at overall
4 size distributions for Priority Mail as a whole. USPS-LR-L-71's third section details
5 this study's analysis methodology.

9 This study's analysis produces size distribution estimates by pound increment and
10 zone for Priority Mail. For zones 5 to 8, these estimates may be found in Tables 1 to
11 4. Tables 5 and 6 summarize the data for all zones. Additionally, this study
12 estimates the average piece density of Priority Mail at 7.08 pounds per cubic foot.
13 The majority of **sampled parcels over 1 cubic foot in volume had payment** in the
14 form of PVI or stamps.

CERTIFICATE OF SERVICE

I hereby certify that I have this day served the foregoing document upon all participants of record in this proceeding in accordance with section 12 of the Rules of Practice.
