The changes update an input, and make a corresponding adjustment to a passthrough percentage, in Within-County worksheet "Pound Data." Details are provided on the following page. These changes do not affect rates, revenue, or volume figures. The revised worksheet is attached, and electronic copy of the entire library reference is also being filed.

Periodicals Within County Changes

In worksheet "Pound Data" for the Within County subclass, cell C15, the non-distance related transportation cost savings has been updated to \$0.033, in accordance with the non-distance related transportation cost figure in the comparable worksheet for the Outside County subclass (worksheet "Pound Data_Adv", cell C43). The change replaces the previous \$0.024 figure. Accordingly, in the same worksheet, the passthrough percentage in cell C16 has been adjusted to be 60 percent, replacing the original 82 percent, so that the total passthrough savings per pound figure in cell C17 remains the same.

This update does not affect rates, volume, or revenue.
