

BEFORE THE
POSTAL REGULATORY COMMISSION
WASHINGTON, D.C. 20268-0001

AMENDMENT TO THE SYSTEM OF
RATEMAKING REGULATIONS

Docket No. RM2009-8

PUBLIC REPRESENTATIVE COMMENTS
(August 21, 2009)

In this proceeding the Commission proposes to change the rounding convention for calculating rate caps. Currently, rate cap calculations are rounded to one decimal place. The Commission proposes to increase the number of decimal places to three. As the Commission explained in its notice of this proceeding, the change is both feasible and beneficial. The Public Representative supports the change.

Respectfully submitted,

Emmett Rand Costich
Public Representative
