DBP/USPS-44 Please refer to your response to Interrogatory DBP/USPS-9. My original intent was to have a response in the form of chart with three columns. The first column would be the level of the Postmaster. The second column would be the total number of post offices that have a Postmaster in that salary level. The total of the entries in the second column would be the some thirty thousand post offices in the country. The third column would be the total number of subordinate facilities [branches, stations, etc.] that are associated with the main post offices that are at each level.

Please provide the desired response including the total of columns two and three.

DBP/USPS-45 Please refer to your response to Interrogatory DBP/USPS-10. Please provide a listing of all of the factors that are considered in determining the Postmaster's EAS level. For each of these factors, please provide the weighting factor that is utilized to convert to a point value. Please provide the minimum number of points that are required for Level 24.
