

BEFORE THE
POSTAL REGULATORY COMMISSION
WASHINGTON, D.C. 20268-0001

MODIFICATION OF MAIL CLASSIFICATION
SCHEDULE PRODUCT LISTS IN RESPONSE
TO ORDER No. 154

Docket No. MC2009-19

FIRST RESPONSE OF THE UNITED STATES POSTAL SERVICE
TO ORDER NO. 391, AMENDING REQUESTED MCS LANGUAGE
FOR ADDRESS MANAGEMENT SERVICES
(February 23, 2010)

The United States Postal Service hereby provides its first response to Postal Regulatory Commission Order No. 391 (January 13, 2010), which approved the addition of several postal services to the Mail Classification Schedule (MCS). As part of that Order, the Commission directed that eight additional services¹ be added to the Market Dominant Product List as elements of Address Management Services. The Commission then ordered that the Postal Service shall within 30 days of the Order provide draft descriptions of these services. Order No. 391 at 31.

Attachment A shows the appropriate changes to the proposed MCS language for Address Management Services. For ease of use, Attachment A includes all the contents of PRC-MC2009-19-LR1, issued January 13, 2010. But the only changes are to the Address Management Services portion. The Postal Service removes the language concerning the Mailpiece Quality Control Certification service because it

¹ Advance Notification and Tracking System; Mailpiece Quality Control Certification; MACTM Batch System Certification; MACTM Gold System Certification; MACTM System Certification; PAGE System Certification; PAVETM System Certification; and Z4INFO.

stopped offering that service in August, 2009. The Postal Service also includes further edits to the Address Management Services Prices section as follows: removes all references to Cartridge pricing, since this format is no longer available; adds a description of the CDS No Stat service, since its minimum price is treated separately from the CDS service minimum; adds a previously omitted price for re-testing FASTforward MLOCR; and adds information about the following existing services or license types that were overlooked: 99 Percent Accurate Method and NCOA^{Link} Mail Processing Equipment (MPE).

Respectfully submitted,

UNITED STATES POSTAL SERVICE
By its attorneys:

Daniel J. Foucheaux, Jr.
Chief Counsel, Pricing & Product Support

Mary Helen Ratchford

Docket No. MC2009-19

PRC-MC2009-19-LR1

Product Descriptions For Draft Mail Classification Schedule

(January 13, 2010)

(Revised February 23, 2010 – additions underlined and deletions struck through)

This Category 6 Library Reference contains product descriptions that reflect Commission rulings in Docket No. MC2009-19 and are intended for future inclusion in the Mail Classification Schedule codified at 39 CFR Appendix A to Subpart A of Part 302—Mail Classification Schedule. These product descriptions are tentative and remain subject to modification by further Commission order prior to inclusion in the final Mail Classification Schedule to be promulgated by the Commission.

MAIL CLASSIFICATION SCHEDULE
Part A—Market Dominant Products
1000 Market Dominant Product List

1001 Market Dominant Product Descriptions

XXXX Special Services

XXXX Address Management Services

XXXX.1 Description

Address Management Services ensure that address elements and address lists are correct and up-to-date. In addition to providing software or information about ZIP Code lists, addresses, or moves, the services also include certifying systems to ensure that the proper address information is used. Some services allow the purchaser or licensee to make unlimited copies or to make additional copies for a fee.

Advance Notification and Tracking System

~~{Reserved}~~

The ADVANCE system provides mailers with delivery performance reports and data for qualified Standard Mail and Periodicals mailings with specific in-home delivery windows.

Address Sequencing

Address Sequencing service provides for the removal of incorrect addresses, notation of missing addresses, and addition of missing addresses.

AEC II (Address Element Correction II) Service

AEC II Service sends addresses with errors that cannot be resolved through other Address Management services to the field for resolution based on knowledge of delivery personnel. The mailer is provided with the correct address or with information that the address is not a recognized deliverable address.

AIS (Address Information Service) Viewer

The AIS Viewer is an interactive CD-ROM that provides the ability to retrieve, view, and print accurate and current ZIP Code information for all 50 states on demand, eliminating hardcopy reports.

Barcode Certification

The Barcode Certification program evaluates manufacturers' printers, computer software, and computer systems that produce a barcode in order to certify that the barcode meets all dimensional specifications required by the Postal Service.

CRIS (Carrier Route Information System)

The CRIS service provides reference information needed to apply carrier route codes to addresses. Copying is allowed for an additional fee.

CASS (Coding Accuracy Support System) Certification

CASS evaluates and certifies the accuracy of address-matching software that applies ZIP + 4, DPV (Delivery Point Validation), LACS^{Link} (Locatable Address Conversion Service), CRIS (Carrier Route Information System), DSF² (Delivery Sequence File—2nd Generation), eLOT (enhanced Line of Travel), RDI (Residential Delivery Indicator) and Five-Digit ZIP. The Postal Service certifies software meeting its standards until the expiration of the applicable CASS cycle. Software must be re-certified for each CASS cycle. Ordinarily, a CASS testing cycle extends from August 1st through July 31st of the next year, and permits software use until the following July 31st.

Change-of-Address Information for Election Boards and Registration Commissions

Change-of-Address Information for Election Boards and Registration Commissions service provides election boards and voter registration commissions with the current address of a resident addressee, if known to the Postal Service.

City State

The City State service is a comprehensive ZIP Code list associated with the appropriate city, county, and Post Office names. Copying is allowed for an additional fee.

CDS (Computerized Delivery Sequence)

CDS service provides and updates delivery sequence address information by carrier route for qualified mailers. The CDS No Stat service provides and updates nondelivery address information about new construction and rural route vacancies by carrier route for qualified mailers.

Correction of Address Lists

Correction of Address Lists service provides current information concerning name and address mailing lists or correct information concerning occupant mailing lists to certain owners of such lists. New names will not be added to a name and address mailing list, and street address numbers will not be added to or changed for an occupant mailing list.

Delivery Statistics

The Delivery Statistics service provides statistical information regarding delivery by carrier route and Post Office box section. Copying is allowed for an additional fee.

Delivery Type

The Delivery Type service provides an ASCII text file that indicates the type of deliveries (*i.e.*, P.O. Box, street, unique, military and general deliveries) made within each 5-digit ZIP Code area in the United States. Copying is allowed for an additional fee.

DMM (Domestic Mail Manual) Labeling Lists

DMM Labeling Lists contain destination ZIP Codes with the corresponding Postal Service facility destination information.

DPV (Delivery Point Validation)

The DPV service in conjunction with CASS Certified address matching software, validates delivery points. Unlimited sub-licensing is allowed by software developers without further payment.

DSF² (Delivery Sequence File – 2nd Generation) Service

The DSF² Service is used to check mailing address accuracy, identify address types, and obtain walk sequence numbers. The DSF² database is the most complete Postal Service address database available, containing every deliverable mailing address in the United States, and is used to: verify that address lists are correct and complete, identify business versus residential addresses, recognize commercial mail receiving agencies, provide walk sequence numbers and postal codes, identify seasonal addresses, detect addresses vacant for over 90 days, and categorize addresses by delivery type, e.g., curbside, door slot, box, *etc.* DSF² processing

includes address standardization that may be used to apply for CASS (Coding Accuracy Support System) qualification.

eLOT (enhanced Line of Travel) Service

eLOT service gives mailers the ability to sort their mailings in approximate carrier-casing sequence. Copying is allowed for an additional fee.

FASTforward MLOCR (Multi-line Optical Character Reader)

The FASTforward system makes change-of-address information for moves available to mailers so that it can be applied to a mail piece while it is being processed on a multi-line optical character reader. Customers use FFMUN (FASTforward Move Update Notification) electronic files to update their databases with change of address information.

Five-Digit ZIP

The Five-Digit ZIP service provides detailed street data for multi-coded cities (*i.e.*, cities that have more than one 5-digit ZIP Code), so that the proper ZIP Code can be identified. Copying is allowed for an additional fee.

LACS^{Link} (Locatable Address Conversion Service)

LACS^{Link} service provides mailers an automated method of obtaining new addresses when rural style addresses are converted to streetstyle addresses. The three types of licenses are:
Interface Developer which grants the right to develop an interface between address-matching software and the LACS^{Link} database service;
Interface Distributor which grants the right to sub-license the interface and the LACS^{Link} database service to third parties; and
End User which grants the right to obtain the LACS^{Link} database service directly from the Postal Service for use in updating mailing lists.

MAC (Manifest Analysis and Certification) Batch System Certification

[Reserved]

The MAC Batch System Certification service evaluates and certifies that manifest/presort mailing products accurately list and calculate postage for presorted non-identical piece mailings consistent with DMM, IMM and Manifest Mailing System processing standards. Software is certified until the expiration of the applicable MAC Batch System cycle.

MAC (Manifest Analysis and Certification) Gold System Certification

[Reserved]

The MAC Gold System evaluates and certifies that manifest mailing systems (software, weigh scales, and label printers) accurately list and

calculate postage for non-identical piece mailings consistent with DMM, IMM and Manifest Mailing system itemized pricing standards. Software is certified until the expiration of the applicable MAC Gold System cycle.

MAC (Manifest Analysis and Certification) System Certification

[Reserved]

The MAC System evaluates and certifies that manifest mailing software accurately lists and calculates postage for non-identical piece mailings consistent with DMM, IMM and Manifest Mailing System standards, until the expiration of the applicable MAC System cycle.

~~MQC (Mailpiece Quality Control) Certification~~

~~[Reserved]~~

MASS (Multiline Accuracy Support System) Certification

MASS provides certification for multiline optical character readers, remote video encoding, local video encoding, and encoding stations (“equipment”). The MASS certification process is designed to evaluate the ability of the equipment to process address information using CASS (Coding Accuracy Support System) Certified™ software, and apply an accurate delivery point barcode to a mailpiece. The Postal Service separately certifies the equipment for a manufacturer and the user. Certified equipment can be used until the expiration of the applicable MASS cycle. Ordinarily, a MASS testing cycle extends from August 1st through July 31st of the next year, and permits use until the following July 31st.

NCOA^{LINK} (National Change of Address) Service

The NCOA^{Link} service makes change-of-address information for moves available to mailers. The six types of licenses are:

NCOA^{Link} Interface Developer which grants the right to develop a software interface between address-matching software and the NCOA^{Link} service database.

NCOA^{Link} Interface Distributor which grants the right to unlimited sublicensing of software interfaces developed pursuant to an NCOA^{Link} Interface Developer License.

NCOA^{Link} Full Service Provider (FSP) which grants the right to perform address list updating services for both the licensee and third party mailers using 48 months of change-of-address data. Postal Service database services such as DPV and LACS^{Link} are included.

NCOA^{Link} Limited Service Provider (LSP) which grants the right to perform address list updating services for third party mailers, as well as for licensee’s own mail using 18 months of change-of-address data.

NCOA^{Link} End User Mailer (EUM) which grants a mailer the right to perform address list updating for its own mail using 18 months of change-of-address data.

NCOA^{Link} Mail Processing Equipment (MPE) which grants a mailer the right to perform address updating directly onto its mailpieces using 18 months of change-of-address data and a multiline optical character reader (MLOCR).

The Postal Service tests the systems under the Developer, FSP₁ and LSP₁ and MPE licenses to ensure that they meet Postal Service performance requirements.

NCOA^{LINK} (National Change of Address) Service — ANK^{Link} (Addressee Not Known) Service Option

ANK^{Link} provides an option for NCOA^{Link} Limited Service Provider and End User Mailer licensees to acquire an additional 30 months of change-of-address information. ANK^{Link} informs mailers that a customer has moved, along with the move effective date. It does not provide the new address.

Official National Zone Charts

The Official National Zone Charts identify the appropriate distance code assigned to each originating and destination pairing for every ZIP Code in the nation.

PAGETM (Presort Accuracy, Grading, and Evaluation) System Certification

[Reserved]

The PAGE System evaluates and certifies the accuracy of publication and print planning (PPP) software that calculates virtual copy weight and the percentage of advertising consistent with DMM Periodicals price computation standards, and certifies users of PPP software who demonstrate knowledge of the software for Periodicals mailings based on DMM standards and applicable Postal Service Customer Support Rulings. Software and users are certified until the expiration of the applicable PAGE cycle.

PAVE (Presort Accuracy, Validation, and Evaluation) System Certification

[Reserved]

The PAVE System evaluates and certifies the accuracy of presort software that sorts mailing lists consistent with DMM mail preparation standards. Software is certified until the expiration of the applicable PAVE cycle.

RDI (Residential Delivery Indicator) Service

The RDI data service verifies whether a delivery type is classified as residential or business.

Z4CHANGE

The Z4CHANGE service provides the information necessary to facilitate frequent and cost-effective updating of very large computerized mailing lists for automation compatibility and improved deliverability. Copying is allowed for an additional fee.

Z4INFO

[Reserved]

Z4INFO is an add-on utility to the ZIP + 4 service that can be integrated into address-matching software to improve address quality.

ZIP + 4 Service

The ZIP + 4 service is the base reference that can be used to assign the correct ZIP + 4 Code associated with a physical address. Copying is allowed for an additional fee.

ZIPMove

The ZIPMove data file assists address-matching software in providing up-to-date, accurate ZIP + 4 codes.

ZIP Code Sortation of Address Lists

ZIP Code Sortation of Address Lists service provides sortation of addresses to the finest possible ZIP Code level.

99 Percent Accurate Method

The 99 Percent Accurate Method provides testing of mailers' address lists to determine how up-to-date the lists are. Lists deemed to meet threshold requirements are considered to be Move Update compliant.

XXXX Customized Postage

XXXX.1 Description

The Customized Postage program authorizes vendors to provide their customers with Postal Service-authorized postage consisting of customer-selected images aligned with Postal Service-approved indicia of postage payment. As a condition of participation, a vendor must comply with all Postal Service requirements, including the content of submitted images and specifications for postage indicia printing. The vendor must also allow Postal Service inspection to ensure compliance.

A vendor's annual participation fee allows the vendor to print at two facilities. Additional print sites may be added at a reduced fee. The Postal Service does not control the price that the vendor charges its customers, beyond the applicable price for postage. The face amount of the postage is remitted to the Postal Service by the vendor.

XXXX.2 Prices

	(\$)
Annual Participation Fee (up to two printing facilities)	300,000.00
Additional Printing Sites (3-50 sites, each site)	50,000.00
Over 50 Printing Sites (each site)	5,000.00

PART B—Competitive Products

Competitive Product List

XXXX Competitive Product Descriptions

XXXX International Money Transfer Service—Outbound

2XXX.1 Description

International Money Transfer Service—Outbound enables customers to make payments or transfer funds to individuals or firms in foreign destinations. This product includes both hardcopy money orders and electronic money transfers, which may be offered in cooperation with foreign postal administrations, commercial banks and money-transfer operators. The amount for a single international postal money order or electronic money transfer may be limited as specified in the International Mail Manual (IMM) or on www.usps.com. Additional restrictions on the quantity and dollar value of international money transfers imposed by law, the destination country, or under requirements prescribed by the Postal Service may apply.

2XXX.2 Price Categories

The following price categories are available for the product specified in this section:

- **International Money Orders**
This applies to hardcopy money orders. A receipt of purchase is provided at no additional cost. The Postal Service will replace money orders that are spoiled or incorrectly prepared, regardless of who caused the error, without charge if replaced on the date originally issued. If a replacement money order is issued after the date of original issue because the original was spoiled or incorrectly prepared, the applicable money order fee may be collected from the customer. For a fee, inquiries or claims may be filed by the purchaser, payee, or endorsee as an ancillary service.
- **Electronic Money Transfers**
The service includes a receipt with the confirmation number, exchange rate, amount of foreign currency, and fee paid for this service. This service is available at select USPS retail outlets and may be provided in partnership with a vendor or directly with a foreign post or its country's designated operator. There are no additional charges when the transferred funds are retrieved in the destination country. For a fee, customers may request a

refund or change the recipient information, consistent with provisions of the IMM or as specified on www.usps.com, as ancillary services.

2XXX.3 Prices

International Money Order

	(\$)
Per International Money Order	3.85
Inquiry Fee	5.20

Vendor Assisted Electronic Money Transfer

	Transfer Amount		Per Transfer (\$)
	Minimum Amount (\$)	Maximum Amount (\$)	
Electronic Money Transfer	0.00	750.00	10.00
	750.01	1,500.00	15.00
	1,500.01	2,000.00	20.00
Refund	0.00	2,000.00	25.00
Change of Recipient	0.00	2,000.00	10.00

Electronic Money Transfer
[Reserved]

2XXX International Money Transfer Service—Inbound

2XXX.1 Description

Inbound International Money Transfer Service provides a service to foreign postal administrations or their countries' designated operators, commercial banks or money-transfer operators for payment of electronic or hard copy money orders to recipients in the United States. There is no charge to the recipient for this service. The service includes processing the paid money orders through the Federal Reserve Bank system and settlement of accounts.

2XXX.2 Price Categories

- **Bilateral or Multilateral Agreements**
Payment is made according to negotiated terms included in bilateral or multilateral agreements.
Inbound Money Transfer Service Agreements 1 (Bahamas, Barbados, Belize, British Virgin Islands, Dominica, Japan, Montserrat, Peru, St. Kitts, St. Vincent)

2XXX Address Enhancement Service

2XXX.1 Description

AEC (Address Element Correction)

AEC service identifies and corrects bad or incomplete addresses using enhanced computer logic.

AMS API (Address Matching System Application Program Interface)

AMS API is a core set of compiled address-matching software instructions that developers incorporate into their software so that address lists can be updated with address data from the following databases, which are integrated into the AMS-API: City State, ZIP + 4, Five-Digit ZIP, eLOT, DPV, and LACS^{Link}.

For an additional fee, a developer may install the AMS-API on multiple computers for its own use. Additional fees are charged if the developer wants to resell its address-matching software. Developers, for an additional fee, may obtain computer software instructions that permit the API to access the RDI data when licensed separately. Additional fees are charged if the

developer wants to resell RDI-API (Residential Delivery Indicator Application Program Interface).

TIGER/ZIP + 4 (Topological Integrated Geographic Encoding and Referencing)

The Topological Integrated Geographic Encoding and Referencing (TIGER/ZIP + 4) service is a bridge file that allows mailers to access other information using the ZIP + 4 codes they already have associated with their addresses. This file offers demographers and market researchers a method to relate ZIP + 4 coded address lists to Census Bureau demographic data.

2XXX Greeting Cards and Stationery

2XXX.1 Description

The Greeting Cards and Stationerys product is offered only through postal retail locations and online postal stores and includes items designed to be used to mail personal messages.

Greeting cards—Greeting cards include cards with envelopes and may be sold individually or as sets.
