BEFORE THE
POSTAL REGULATORY COMMISSION
WASHINGTON, D.C. 20268–0001

MODIFICATION OF MAIL CLASSIFICATION SCHEDULE
REGARDING ADDRESS MANAGEMENT SERVICES

Docket No. MC2010-25

NOTICE OF THE UNITED STATES POSTAL SERVICE OF
CLASSIFICATION CHANGES RELATED TO ADDRESS MANAGEMENT SERVICES
(July 2, 2010)

Pursuant to 39 C.F.R. §§ 3020.90 and 3020.91, the United States Postal Service hereby gives notice of changes in classification established by the Governors. The first change removes the Delivery Type service from the list of services included in Address Management Services. The Delivery Type service identifies the type of delivery available by 5-digit ZIP™ Code. This service is limited, outdated, and not widely used. Although there were 42 Delivery Type customers in Fiscal Year 2009, so far in FY 2010 only 19 customers have requested a subscription. The Delivery Type information is also provided by two other services, City State and Delivery Statistics. These two services provide more extensive and up-to-date information, at a somewhat higher fee. Some of the Delivery Type customers already also subscribe to either City State or Delivery Statistics, and therefore would not need to add any subscriptions in order to continue to obtain the information they desire. If all the other Delivery Type customers decided to upgrade to the alternatives, they would pay, in total, less than $5000 more. Even this impact on customers is likely overstated, because Postal Service discussions with some Delivery Type customers indicate that they could obtain the information they currently use from Delivery Type by purchasing AIS Viewer service, at the same price as Delivery

Type. The Postal Service's plan is to offer Delivery Type subscriptions through September 30, 2010, and honor subscriptions until they expire.

The second MCS change is to remove the specification as to how information is provided to customers. Currently, the MCS identifies CD-ROM, DVD, or disc as the means of providing information for the following services: CRIS Route, City State, Delivery Statistics, eLOT, 5-Digit ZIP, Official National Zone Charge, Z4 Change, ZIP+4, ZIP Move, AMS API, and TIGER ZIP+4. The MCS change would remove these references to physical media, so that the information could be provided by any appropriate means, such as physical media or electronic file transfer. That change, which would simply expand the options for the Postal Service and its customers, would be effective as soon as possible.

The Postal Service hereby submits to the Commission conforming changes in the Mail Classification Schedule, as shown in the following pages. The Postal Service believes that the changes are consistent with 39 U.S.C. § 3642 and should be incorporated by the Commission into the MCS.

Respectfully submitted,

UNITED STATES POSTAL SERVICE
By its attorneys:

XXXX   Address Management Services

* * * * *

CDS (Computerized Delivery Sequence)

CDS service provides and updates delivery sequence address information by carrier route for qualified mailers.

Correction of Address Lists

Correction of Address Lists service provides current information concerning name and address mailing lists or correct information concerning occupant mailing lists to certain owners of such lists. New names will not be added to a name and address mailing list, and street address numbers will not be added to or changed for an occupant mailing list.

Delivery Statistics

The Delivery Statistics service provides statistical information regarding delivery by carrier route and Post Office box section. Copying is allowed for an additional fee.

~~Delivery Type~~

~~The Delivery Type service provides an ASCII text file that indicates the type of deliveries (*i.e.,* P.O. Box, street, unique, military and general deliveries) made within each 5-digit ZIP Code area in the United States. Copying is allowed for an additional fee.~~

DMM (Domestic Mail Manual) Labeling Lists

DMM Labeling Lists contain destination ZIP Codes with the corresponding Postal Service facility destination information.
