Re: Docket No. MC2011-16/CP2011-53

In accordance with Commission Order No. 699, issued on March 18, 2011, the Postal Service hereby provides its the volumes, revenues, and costs data for Sample Showcase boxes mailed at both Parcel Select rates and the alternative per-piece charge.

The recent Sample Showcase mailings would have had a cost coverage of [REDACTED] based on the model submitted to the PRC for the approval of Parcel Select Contract 1. However, for the most recent mailings three factors differed from the model submitted that had a net positive impact on cost coverage:

1. The entry point for most of the pieces was Destination Sectional Center Facility ("DSCF") (versus Destination Network Delivery Center ("DNDC"));
2. Most of the pieces were presorted versus none presorted; and
3. Most of the pieces were in a 12-13 ozs range versus 10-16 ozs.

To better reflect the actual cost for these mailings, we updated the mail processing and transportation costs. The revised transportation cost model is attached to this filing. The updated mail processing cost can be derived from the initial filing.

The net results of these changes increased cost coverage to [REDACTED].

Sincerely,

Brandy A. Osimokun
Attorney
