RECEIVED
JUL 7 4 01 PM '98

July 7, 1998

Hon. Margaret P. Crenshaw, Secretary
Postal Rate Commission
1333 H Street, NW, Suite 300
Washington, D.C. 20268-0001

Dear Ms. Crenshaw:

In connection with the Commission's rules pertaining to periodic reports, 39 C.F.R. § 3001.102 (1997), I have enclosed copies of several items underlying the production of the FY 1997 Cost and Revenue Analysis (CRA) Report. In past years, these materials have been described as "portions of LIOCATT" used in the Report and certain "transportation workpapers," as referenced in the rules.

While those descriptions still apply in certain respects, changes in costing methodology and data sources that were introduced in Postal Service testimony in Docket No. R97-1 have resulted in some of the supporting materials being provided in forms that differ from those provided previously. We have included with the enclosed materials a listing that matches each item provided here with the comparable workpapers previously provided. The following summarizes the substitutions:

(1) *Mail Processing Costs.* The items labeled "MODS 1 & 2 Pools" replace LIOCATT Workpapers C-1 and C-2 provided in prior years.

(2) *City Carrier Costs.* The information labeled "LIOCATT for City Carriers" is the same as LIOCATT Workpapers C-3 and C-4 provided in prior years.

(3) *Transportation Costs.* Documentation labeled "U.S. Postal Service Spreadsheet Transportation Model," "USPS Transportation Model Spreadsheets," and "Alaska AP Summary Sheets" replace the Transportation Workpapers 14.0.1 through 14.2.1 provided in prior years.

I should also note that, for production of the FY 1997 CRA Report, a spreadsheet

POSTAL RATE COMMISSION
DOCKETED

OFFICE OF THE SECRETARY

475 L'ENFANT PLAZA SW
WASHINGTON DC 20260

version of the transportation cost model was developed in Excel 5.0 to replace the mainframe COBOL version, in order to make the model more accessible. Accordingly, we have provided documentation of "U.S. Postal Service Spreadsheet Transportation Model" and "USPS Transportation Model Spreadsheets" in the form of files on diskette labeled "Model.doc" and "TMFY97.xls, respectively.

Sincerely,

Daniel J. Foucheaux, Jr.
Chief Counsel, Ratemaking

Enclosures

cc: Ms. Brown

EXPLANATION OF FY 1997 WORKPAPERS FILED PURSUANT TO 39 CFR § 3001.102

Each year, the Postal Service files certain workpapers underlying its Cost and Revenue Analysis Report. Those workpapers are defined in 39 CFR § 3001.102 as "portions of LIOCATT used in the report" and "transportation workpapers 31 and 57." In compliance with this provision, the Postal Service traditionally has sent:

LIOCATT Workpaper C-1:	LIOCATT for Clerks and Mailhandlers by Functional Component
LIOCATT Workpaper C-2:	LIOCATT for Clerks and Mailhandlers by Operation Code
LIOCATT Workpaper C-3:	LIOCATT for City Carriers by Route Codes 71-86 and 99
LIOCATT Workpaper C-4:	LIOCATT for City Carriers by Route Codes 87-98
Transportation Workpaper W/S 14.0.1:	Summary of Transportation Costs by Account
Transportation Workpaper W/S 14.0.2:	Intra-Alaska & Intra-Hawaii Air Distribution Keys
Transportation Workpaper W/S 14.0.3:	TRACS Distribution Keys
Transportation Workpaper W/S 14.0.6:	Alaska Transportation Costs
Transportation Workpaper W/S 14.1.1:	Manual Inputs - PQ4
Transportation Workpaper W/S 14.1.1.1:	Manual Inputs - PQ3
Transportation Workpaper W/S 14.1.1.2:	Manual Inputs - PQ2
Transportation Workpaper W/S 14.1.1.3:	Manual Inputs - PQ1
Transportation Workpaper W/S 14.1.2:	PQ4 Purchased Transportation Report

Transportation Workpaper W/S 14.1.2.1:	PQ3 Purchased Transportation Report
Transportation Workpaper W/S 14.1.2.2:	PQ2 Purchased Transportation Report
Transportation Workpaper W/S 14.1.2.3:	PQ1 Purchased Transportation Report
Transportation Workpaper W/S 14.2.1:	Annual Purchased Transportation Report

This year, some different materials are being sent because, in some instances, the FY 1997 Cost and Revenue Analysis Report was developed from different inputs. The information being provided with the FY 1997 CRA is intended to replace the earlier materials as follows:

1. Mail Processing Costs - MODS 1 & 2 Pools is intended to replace LIOCATT Workpapers C-1 and C-2. The FY 1997 CRA was prepared using the Bradley-Degen costing methodology from Docket No. R97-1 for mail processing costs.

2. The information submitted from LIOCATT for City Carriers is the same as LIOCATT Workpapers C-3 and C-4.

3. Documentation of U.S. Postal Service Spreadsheet Transportation Model, USPS Transportation Model Spreadsheets, and Alaska AP Summary Sheets are intended to replace all of the above-listed Transportation Workpapers. For the FY 1997 CRA, a spreadsheet version of the transportation model was developed in Excel 5.0 to replace the mainframe COBOL version, in order to make the model more accessible. Documentation of U.S. Postal Service Spreadsheet Transportation Model and USPS Transportation Model Spreadsheets are also furnished on diskette as "Model.doc" and "TMFY97.xls," respectively.

TRANSPORTATION COSTS

Copy 1

DOCUMENTATION OF U. S. POSTAL SERVICE SPREADSHEET TRANSPORTATION MODEL

INTRODUCTION

In recent years, the model used by the Postal Service for development of Cost Segment 14 was programmed in COBOL on a mainframe computer. Conceptually, the model is a rather straightforward spreadsheet. In fact, many of the inputs to the model were developed in LOTUS 1-2-3. The COBOL program presented a barrier to those more familiar with personal computer applications and made changes to the model dependent on the often limited availability of a COBOL programmer. In order to make the model more accessible to analysts, a spreadsheet version has been developed in Excel Version 5.0. (The 1997 model is developed in Windows 3.1 on a Pentium 100mhz personal computer with 32 megabytes of memory.)

ORGANIZATION OF THE MODEL

The spreadsheet version of the model is developed as a workbook with nine sheets or sections organized as follows:

Section 1: Accrued Costs. This sheet presents accrued costs from various vintages of the trial balance report. Postal Quarter (PQ) 1, Postal Fiscal Year (PFY) from the prior year, government fiscal year (GFY) from the prior year, PQ2 year to date (YTD), PQ 3 YTD, and GFY from the current year are entered manually.
Results for accounting period 14 are developed by subtracting PFY from the prior year from GFY from the prior year. Government quarter (GQ) 1 is the sum of PQ 1 and AP 14. PQ 2 is result of subtracting GQ 1 from PQ 2 YTD. PQ 3 is the difference between PQ 3 YTD and PQ 2 YTD. PQ 4 is the difference between GFY and PQ 3 YTD. Accounts are arranged in approximate alignment with the cost pools developed in Section 3.

For brevity's sake, PFY and GFY results from the prior year are not printed but may be accessed by selecting the Format Column Unhide feature in Excel.

Section 2: Adjustments. This sheet contains several adjustments to accrued costs necessary to the development of the cost pools. Rail plant load costs are reallocated to the freight rail and empty equipment cost pools based on a special study. Excise taxes, which are based on linehaul costs, are allocated to air transportation cost pools based on relative linehaul costs. Alaskan highway costs are removed from intra BMC cost accounts based on data obtained from the Seattle distribution networks office. Inland water costs are reduced by a factor representing the degree to which these routes perform rural delivery service. A portion of international air costs are applied to official mail, accounting for Postal Service use of international air transportation. An adjustment is made to Eagle network costs to account for the costs of certain international operations not otherwise accounted for. Personnel screening costs for employees of the three air networks are allocated to the three network cost pools. Highway penalties and fines are allocated to the four major interfacility cost pools.

Section 3: Cost Pools. This section develops the pools of volume variable costs to be distributed to postal products. First, the accrued costs are adjusted based on the data in Section 2. Next, each of the adjusted cost accounts are multiplied by a volume variability factor. When volume variable cost are summed across accounts in a cost pool, the result is the overall volume variable costs for the cost pool. Also, the cost of the Christmas network and Christmas air taxis are aggregated in PQ2 since the network operates in this time period.

Section 4: Distribution Keys. This section contains distribution key data from special studies and the Transportation Costing System (TRACS). Data for Intra Hawaii air, intra Alaska air, and plant load operations are derived from special studies and applied to all four quarters. Data for Christmas air

operations are derived from merging TRACS Eagle and passenger air data and ASYS payment records. The Christmas air distribution key data change annually.

Sections 5 - 8: Quarterly results. These sections distribute the cost pools based on respective distribution keys. Distribution keys for each column are based on TRACS, a special study, or a "burdened" key. The TRACS and special study keys are shown explicitly in Section 4. The burdened keys are not shown explicitly and vary depending on the column in question. Air taxi costs are distributed based on the subtotal of costs from Hawaii, Alaska, Christmas, Eagle, Western Air and Passenger Air. (A small international adjustment pulls international costs from the Eagle cost pool.) In highway, Terminal and Van-Damage costs are distributed based on the subtotal of costs from the inter facility highway cost pools and plant load highway costs. The Alaskan Highway key is based on the sum of inter-BMC and rail freight costs, as recommended by the Postal rate Commission in Docket No. R94-1. Area Bus costs are distributed using the Amtrak key. Empty Equipment costs are distributed based on the costs of all other highway operations. In rail, empty equipment costs are distributed based on the costs of Amtrak, freight rail and plant load costs. IN water Inland costs are distributed using the TRACS intra SCF highway distribution. Offshore costs are distributed using the sum of rail freight and inter BMC highway costs.

Section 9: Fiscal Year. This section sums the results of the four quarters in Sections 5 - 8.

EXPLANATORY NOTES

Notes describing the motivation for various costing treatments are included in the spreadsheet file. These notes do not appear in the hardcopy output.

PRINTING

Each Section can be printed individually, or the entire workbook can be printed. To print a section, display the desired section and select File Print Current Spreadsheet. To print the workbook (i.e., the entire model), select File Print Entire Workbook. Tampering with the print commands in Page Setup can disrupt the output of the printing process.
