

PREFACE: USPS-FY2011-46  
Copy of Collection Point Management System (CPMS) (December 2011)  
Responsive to ChIR1, Question 27(f)

Purpose:

This Category 4 library reference is supplied in response to Presiding Officer's Information Request No. 1, Question 27(f). The original response to that discovery request was that a responsive copy of the Collection Point Management System (CPMS) (meaning end of FY2011) would soon be filed. However, the Postal Service was unable to locate anywhere a copy from the end of the fiscal year, despite the fact that such a copy had been made in anticipation of its need in this docket. Accordingly, the closest analog that could be found, a copy from mid-December, 2011 was located and is accordingly being filed.

Predecessor Material:

Set of 20 Excel files filed on media as part of USPS-FY10-43.

Input/Output:

CPMS is a real time data system that inventories collection points and boxes nationwide.

Contents and Organization:

USPS-FY11-46 consists of approximately 20 Excel files each of which encompasses a range of 50 three-digit ZIP Code areas (*i.e.*, from ZIP Codes 800-849). Respective filenames indicate the ZIP Code ranges.
