Interrogatories of the National Association of Presort Mailers  
(NAPM/USPS-T6-1-4)**

**PRC Docket No. N2012-1**

**PREFACE**

This Category 2 library reference provides material in support of Responses of Postal Service Witness Martin to Interrogatories of the of the National Association of Presort Mailers (NAPM/USPS-T6-1-4). This library reference has one Excel spreadsheet in its root folder, labeled "Current and Proposed Plant to Plant ADV.xls."

For each origin/destination facility pair in the current network and in a hypothetical, rationalized network, the spreadsheet includes the mode of transportation, the identity of the origin processing facility, and the identity of the destination processing facility. The non-public version of this Library Reference (USPS-LR-N2012-1/NP15) contains the average, daily First-Class Mail volume (ADV) between origin and destination facility pairs. The source for the ADV data is the Origin Destination Information System (ODIS).
