conducted a joint research program on weld residual stress (WRS) modeling under a memorandum of understanding. This research program consisted of several modeling and measurement studies on prototypic mockups to represent the residual stress state in safety-related nuclear components susceptible to primary water stress corrosion cracking, see NUREG–2162 (ADAMS Accession No. ML14087A118). Since then, the NRC has made use of the data gained in that research program to formulate a potential validation scheme for finite element modeling of WRS. The NRC’s proposal is documented in a draft NUREG entitled, “Weld Residual Stress Finite Element Analysis Validation: Part II—Proposed Validation Procedure” (ADAMS Accession No. ML18242A007). The NRC is requesting public comment on this document. Specifically, the NRC would like feedback on four specific technical issues related to the proposed validation procedure:

1. The NRC recommended the use of the average hardening approach in the current version of the draft NUREG (“average hardening” meaning the arithmetic mean of isotropic and nonlinear kinematic results). Given the discussion in Section 5.2, please comment on the advantages and disadvantages of using either the averaging approach or isotropic hardening. What initial and recurring costs are foreseen in implementing either approach in future analyses?

2. The NRC introduced four options for benchmark in Section 5.4.2. The NRC chose to develop the validation scheme with a benchmark based upon the modeling results, rather than the measurements. Please comment on the NRC’s proposal and whether the justification is adequate.

3. Please comment on the proposed quality metrics introduced in Section 5.4.7. Are these metrics appropriate for their intended purpose? Has the NRC presented an appropriate technical justification (see Sections 5.4.8 and 5.4.10) for the proposed metrics?

4. Please comment on the feasibility of the proposed validation scheme. What initial (e.g., software and guidance development) and recurring (i.e., costs for each analysis) costs are foreseen for implementing the validation scheme?

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736.

Extension: Rule 154; SEC File No. 370–438; OMB Control No. 3235–0495.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), the Securities and Exchange Commission (“Commission”) is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension approval and budgetary review.

The federal securities laws generally prohibit an issuer, underwriter, or dealer from delivering a security for sale unless a prospectus meeting certain requirements accompanies or precedes the security. Rule 154 (17 CFR 230.154) under the Securities Act of 1933 (15 U.S.C. 77a) (the “Securities Act”) permits, under certain circumstances, delivery of a single prospectus to investors who purchase securities from the same issuer and share the same address (“householding”) to satisfy the applicable prospectus delivery requirements. The purpose of rule 154 is to reduce the amount of duplicative prospectuses delivered to investors sharing the same address.

Under rule 154, a prospectus is considered delivered to all investors at a shared address, for purposes of the federal securities laws, if the person relying on the rule delivers the prospectus to the shared address, addresses the prospectus to the investors as a group or to each of the investors individually, and the investors consent to the delivery of a single prospectus. The rule applies to prospectuses and prospectus supplements. Currently, the rule permits householding of all prospectuses by an issuer, underwriter, or dealer relying on the rule if, in addition to the other conditions set forth in the rule, the issuer, underwriter, or dealer has obtained from each investor written or implied consent to householding. The rule requires issuers, underwriters, or dealers that wish to household prospectuses with implied consent to send a notice to each investor stating that the investors in the household will receive one prospectus in the future unless the investors provide contrary instructions. In addition, at least once a year, issuers, underwriters, or dealers relying on rule 154(b) must send a notice to each investor stating the required options.

1 The Securities Act requires the delivery of prospectuses to investors who buy securities from an issuer or from underwriters or dealers who participate in a registered distribution of securities. See Securities Act sections 2(a)(10), 4(1), 4(3), 5(b) (15 U.S.C. 77(b)(a)(10), 77(a)(1), 77(d)(3), 77(b)(1); see also rule 174 under the Securities Act (17 CFR 203.174) (regarding the prospectus delivery obligation of dealers); rule 154(b) under the Securities Exchange Act of 1934 (17 CFR 240.15c2–8) (prospectus delivery obligations of brokers and dealers).

2 Rule 154 permits the householding of prospectuses that are delivered electronically to investors only if delivery is made to a shared electronic address and the investors give written consent to householding. Implied consent is not permitted in such a situation. See rule 154(b)(4).
