POSTAL SERVICE

Privacy Act of 1974; System of Records

AGENCY: Postal Service™.

ACTION: Notice of a revised system of records.

SUMMARY: The United States Postal Service (USPS™) is proposing to revise a General Privacy Act System of Records to support an initiative sponsored by the United States Postal Inspection Service to conduct link analysis for investigative purposes.

DATES: These revisions will become effective without further notice on January 18, 2022, unless comments received on or before that date result in a contrary determination.

ADDRESSES: Comments may be submitted via email to the Privacy and Records Management Office, United States Postal Service Headquarters (privacy@usps.gov). Arrangements to view copies of any written comments received, to facilitate public inspection, will be made upon request.

FOR FURTHER INFORMATION CONTACT: Janine Castorina, Chief Privacy and Records Management Officer, Privacy and Records Management Office, 202-268-3069 or privacy@usps.gov.

SUPPLEMENTARY INFORMATION: This notice is in accordance with the Privacy Act requirement that agencies publish their systems of records in the **Federal Register** when there is a revision, change, or addition, or when the agency establishes a new system of records. The Postal Service is proposing revisions to an existing system of records (SOR) to support the implementation of a link analysis to be conducted by the United States Postal Inspection Service through the introduction of new investigative software.

I. Background

The United States Postal Inspection Service (USPIS) is focused on continuous improvement in the effort to

stay one-step ahead of bad actors and to preserve the sanctity of the mail. To further this objective, USPIS is implementing a process to conduct a link analysis across multiple disparate Postal systems to aggregate data and increase efficiency. This process will automate the analysis process in part, reducing manual effort by Postal Inspectors and Inspection Service analysts.

Disclosure of relevant information or records derived from general and customer systems is authorized by the Privacy Act under USPS Routine Use number two, Disclosure for Law Enforcement Purposes.

II. Rationale for Changes to USPS Privacy Act Systems of Records

The Postal Service is proposing to modify USPS SOR 700.000, Inspection Service Investigative File System, to accommodate the process proposed by USPIS. USPIS will collect and aggregate eight data elements—Name, Address, 11-Digit Delivery Point ZIP Code (ZIP 11), Phone Number, Email Address, Tracking Number, IP Address, and Moniker—from the following four data sources: Customer Registration, Inspection Service Investigative File System, Click-n-Ship, and National Meter Accounting and Tracking System (NMATS).

To effect this change, one new purpose has been added to the existing SOR to reflect the usage of these data elements to conduct the link analysis. Further, the eight enumerated data elements have been added as a new Category of Records.

III. Description of the Modified System of Records

Pursuant to 5 U.S.C. 552a(e)(11), interested persons are invited to submit written data, views, or arguments on this proposal. A report of the proposed revisions has been sent to Congress and to the Office of Management and Budget for their evaluations. The Postal Service does not expect this amended system of records to have any adverse effect on individual privacy rights.
